EPOCHS OF CHINESE HISTORY.

The Tsin Dynasty (8, C. 255-266.) POR THE 'CHINA MAIL.']

The one famous and all powerful Emperor of the Tsin dynasty, stands side by side with the world's greatest conquerors. He has been compared with the first William of Germany! his work to the unification of the German empire, and Chancellor Li-sze to the iron Bismark, We may here restate the political position in brief, that the reader may easily comprehend it. China was at that time composed of nine powerful States, of which one, Chow, had, for more than 800 years been the sezerain, and whose supremacy the others recognised. It might be assumed that when Chih Hwang tai had gratified his inordinate ambition, he would have devoted his great talents to the pacification of the conquered peoples. He did nothing of the kind. Never parhaps was a nuler so consumed by a determination to perpetuate his own dynasty; few monaichs ever attempted more to secure this purpose, and few have made a more column failure. When this was discovered. the enraged monarch ordered that four hundred and sixty of them be executed, and this deed was done. There followed a reign of terror, the like to which happily is seldom seen. This deed has attached an irremovable stigms to the name of the first Emperor of China, and to his minister. The subjugation of the states, and the

Chih moves down the ages, known as the Imperial Wall Builder, and is directly responsible for the psin, and agony, which would be necessarily connected with work of this kind. Once when the Emperor was on a tour of inspection, an acrolite was discovered, on which were engraven words, which foretold the Emperor's death. In a fit of rage he gave an order, which reminds us of that given by Herod, and all the scholars within the adii of the spot where the stone was found were slaughtered.
